Yeah?
What's in it
for me?

Welcome to
WII-FM. (Radio Station
What's In It For Me.)
I'm here to tell you there's
PLENTY of new
enhancements in this
release.

The SuperLink Development Team, Business Reps, Technical support and business users have been very busy working on SuperLink Version 2.7. Things that have been added (for YOU) include:

- H An automated workflow process for preparing NED forms for entry. This will help YOU do your exams more effectively and efficiently...less paperwork and SuperLink will notify you of what to do and when to do it!
- H A new Watch List view where Banking Supervisors and Officers can share their knowledge. YOU can learn the latest on institutions.
- H Additional Alerts, Views and Data for monitoring the condition of institutions. This has eliminated several labor-intensive manual processes for BSR and CRM. Additionally YOU can have the latest information on the condition of YOUR institutions.
- H While we were looking at the new exam and condition data, the team and users identified new and better ways to present it to YOU. YOU should find the new Exam/CRM views helpful.
- H With two levels of financial Alerts, YOU can now filter the financial Alerts for either "Early Warning" or "Normal." Now YOU will see a reduced number of Alerts and can concentrate on those that are really important to YOU.
- H We've added new sorts and views for Alerts. YOU can easily find what YOU need to KNOW in the Alerts Database.
- H There is a new Performance Database that will store and track the Departmental Goals and Balanced Scorecard. YOU (the management team) will have a consistent way to record and report your accomplishments. YOU (everyone) will have full access to know what each section/team is doing.

This release was "brought to you by" a committed team of individuals and represents the greatest user participation to date in defining, reviewing and testing the enhancements.
